CONCRETER'S CHECKLIST

*****Each box must be ticked then forward this form to the appropriate supervisor. *****

	The Screed Buddy's are within 3mm of FFL before pouring of concrete.
	Ensure Screed Buddy caps are set to the correct heights to allow for falls to wastewater traps and set downs.
	All Screed Buddy's have been taped or cable tied before pouring of concrete.
	I have not poured concrete directly over pipes & they have been left visible
	All pipes have been checked at the point of screed to ensure pipes have not moved.
	I have read and understood the above information and have made sure that the Screed Buddy's are within 3mm of the finished floor level
