The Screed Buddy System is a self-contained system that protects the integrity of uprising pipes in concrete pads. It is a cost effective and easy to use system. It saves you time and money and perfect for Tier 1 applications.

With technology, allowing for clear pipe identification to its location and pipe size, and allowing the laser screed, and especially mechanical trowelling, to glide right over the top of the pipe without disturbing the integrity of the pipe, which is cut off below the finished floor level, (FFL) and capped with the Australian made Screed Buddy System.

The Screed Buddy System is 100% recyclable and can reduce hundreds of kilometers of excess PVC pipe and post-tension grout tube waste entering landfill. By using the FFL as your marker, you can measure the exact amount of material required, saving you money.

Screed Buddy System patented technology is licensed by Pipetag Pty Ltd.

We are an Australian owned and operated company with our Screed Buddy System manufactured in South Australia.

Our belief and commitment to our specialised product will see an immediate positive return to your business, through reduced operational costs whilst covering your WHS responsibilities.

The solution is the Screed Buddy System. It improves workplace safety by eliminating the hazard, for the first time on a residential, commercial and industrial building site. Screed Buddy is the perfect control measure for Tier 1 Construction.

Screed Buddy System was developed by a qualified builder with over 20 years' experience in the construction industry. The introduction of Screed Buddy is an industry changing product, you will wonder how you ever got by without it.

The Screed Buddy System will improve safety, quality and productivity by:

- **Eliminating** 'Risk of a Fall 'due to no rising pipes exposed.
- Trowel the concrete pad in one continuous motion, no need to hand trowel around rising pipes. **Better quality** pad finish from one edge to the other. **Saving you time and money.**
- **Reduced wages** as you will not need additional labour to repair damaged pipes.
- **Reduce the risk** of 'Manual Handling' incidents due to trip hazards being eliminated as Screed Buddy is set at Finished Floor Level, (FFL). You will not have to lift over or around pipes anymore.
- **Provide a safe workplace** as you can now have a safe designated plant, equipment and material storage area.
- Provide a safe workplace through **safe designated walkways** around a construction site.
- **Eliminating foreign debris** or cement entering the pipes.
- **Maintaining the integrity** of pipework with the Screen Buddy System secure fastening technique.
- Quick and easy installation, able to **train workers competently** in minutes.

Screed Buddy Systems, improve your safety, reduces work hours and wages in finishing a concrete pad and allows for a better finished concrete pad. Ongoing safety benefits as your building area is not cluttered with rising pipes.

Safety in Design is a reference that links WHS legislative duties of a designer to the products and processes used in a project. Using the hierarchy of control and eliminating the hazard is the best option, the Screed Buddy System now provided designers a WHS compliant outcome.

WHS responsibilities cover several duty holders in the construction industry, starting at the Principal Contractor through to the workers. Each have a role in managing the hazards in the workplace before they cause injury.

How many toolbox and safety meetings, JSA's, risk assessment, site inspections and SWMS have you conducted regarding rising pipe and trip / fall hazards, or damage pipes, or foreign debris in the pipes? With the only control measure being 'take more care' or using bollards to identify and duct tape to seal the pipe. The risk is always there!

Now with the Screed Buddy System you can implement a suitable control measure that eliminates all these hazards in one go. Saving you time and money whilst covering your WHS responsibilities.

As a WHS responsible person, the Screed Buddy system will assist you comply with:

- WHS Act – Principals that Apply to Duties
- WHS Act – Primary Duty of Care
- WHS Regulations - Management of Risks to Health & Safety
- WHS Regulations - WHS Management Plan
- WHS Regulations - Safe Work Method Statements
- WHS Regulations - Managing Risk to Health & Safety
- Code of Practice – Construction Work
- Many more WHS legislative requirements are met by using the Screed Buddy System.

Please note: Pipetag PTY LTD can provide you with an elimination solution as part of your risk management approach; we're not responsible for your actual safety performance or outcomes.

Anyone can use and fit the Screed Buddy System, simply watch the on-line tutorial at www.screedbuddy.com/installation, and match the colour Screed Buddy System to the size pipe. It's a quick, safe and cost saving process that will speed up your build time.
